### Beforehand

One challenge is common to all European countries Educational System, the prevention school dropout. The School Inclusion N°134309-LLP-1-2007-1-IT-Comenius-CMP, financed in the framework of the Life Long Programme, Comenius subprogramme has given evidence to the fact that teachers are suffering from a lack of skills and competences, and consequently of motivation in understanding and dealing with pupils at risk of school abandoning. Teachers often are not able to identify with the necessary anticipation the manifesting of the risk factors leading drop out and to the necessary initiatives to give effective answers.

The Stay@School project to provide an effective answer to the needs of the teachers outlined above, intends to transfer the successful experience of the School Inclusion project, evaluated positively both by the European Commission and by the external evaluator: "the main contents of the teachers' training programme provides the necessary skills and tools to fight students' drop out and prevent early school leaving".

The project aims to improve the portal developed during the School Inclusion project in order to transfer its contents on a Geographical basis, focusing on the involvement of teachers from different countries that the ones that were involved in the previous project and as far as Italy is concerned, spreading the use of the School Inclusion Portal in different regions.

### What is the material about?

One of the project objectives is to develop a collection of educational products on the prevention of early school leaving by engaging teachers in hands-on experience (learning by doing) aimed to test the skills and abilities acquired during the course, through the creation of education materials and easy to use flexible information to prevent and tackle the problem of scholastic drop-out (such as a brochure, a cartoon, a multimedia educational module, a short film, etc.).

We have chosen this type of self-assessment tools, closed-ended questionnaires, because they can be easily analyzed and they give teachers a realistic insight into the drop out phenomenon in their school.

These questionnaires give a sense of the strengths and weaknesses of the current drop out prevention strategies used in schools; they can also provide useful information for more realistic future action plans. They can be applied in any school.

The student questionnaires explore the characteristics of students at risk of dropping out and their family background context, academic history, experience with and opinions of schooling, attitude towards school, causes of dropout, and future plans.

The teacher questionnaire examines teacher-parent interaction, warning systems for students at risk, and school management and policies. The instruments focus on how schools recognize students at risk, the characteristic of schools with high dropout, reasons that schools believe cause student dropout, and what can be done to prevent dropout.

The parent questionnaire examines parents' experience with the schooling their child has received, parents' opinion of what should be done to keep children in school, competitive activities that distract their children from school.

## Tools for assessing the risk of school dropout

Stay@School Project

- Outside school

School information (the level of school success):

- Motivation for learning
- Number of failed school subjects and their names
- School subjects with good and very good results
- School subjects with weak results
- School – parents/ legal representatives relationship
- Strengths
- Weaknesses

### Part 2: Proposed solutions to diminish the risk of school dropout

With regard to the child's specific situation: causes of the problem that determine one or more active risk indicators, weaknesses and strengths – suggest solutions for diminishing the risk of school abandoning.

Take into consideration at least the following actions that you can take as a primary school teacher or head teacher of the monitorised child:

- Request support from the teachers (teachers of the school subjects with a large number of absences or weak results etc.);
- Support from the classmates: help from the one or more classmates for studying at the mentioned school subjects)
- Support offered by the parents' community – to help the family in the difficult situation
  - A social investigation in case of a precarious socio-economic situation of the family and/if there are any suspicions regarding neglecting or abuse on the child (municipality)
  - Intervention of a psychologist. Complete evaluation of the child with disabilities
  - Parental counselling and professional orientation (school counsellor)
- Involvement of private institutions (NGOs, sponsors etc) from the community (examples of activities):
  - Involvement in curricular or extracurricular activities (vocational activities or volunteering)
  - Support for furnishing or improving children's homes
  - Donations (books/clothes etc.)
  - Solutions for alternative transportation possibilities

### 4. QUESTIONNAIRE FOR TEACHERS/ PARENTS

#### A. Questionnaire for teachers:

In order to reach school success, pupils must receive a proper education. Please answer the following questions honestly, to help us identify the causes of school failure.
