Minutes
The teachers participating on the first module "Identification of students at risk" of the course project has been discussion about the general topic that this module has shown.

The main ideas have been that everything that was said was very obvious and it make difficult to do any post on the forum to add something new.

Also they said that the most interesting part was the part talking about good practices because it could give them some new ideas to implement on its own students.

The meeting also was a chance to talk about the password and username problems, there were many teachers that did not received the mail with the information and they couldn't participate from the first day on the forum.

We decided to focus our posts on the idea of the future educational materials that we have to create and to try to think how to link the module topics on those materials.
